The most modern stylish swimming pool on the market today. The Elegance features square corners to make it ideally suited to today's modern architectural building trends.

The square corners and crisp clean lines match perfectly with the latest paving and coping products to make landscaping the Elegance a pleasure.

Kerry Pain's pool design concepts include:

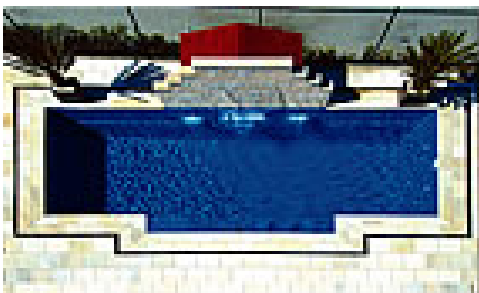

- Space - Too many pools have the dimensions but just don't have the space. The Elegance is designed to give you plenty of room for end to end swimming or playing games. The swimming corridor is completely unobstructed and even the copings are only four inches wide in order to maximize the space inside the pool.

- Relax – The steps are conveniently placed on the side of the pool and combine with the spa seat area. You can have spa jets and aeration fitted for an enjoyable and relaxing spa. It's a great place to sit and relax while the kids are playing in the pool.

- Safety – The Elegance has Leisure Pools perimeter safety convenience built into the wall of the pool two feet down from the top of the pool. Small children can easily stand on the step ledge to get out of the pool.
